> Impact-resistant and UV stabilised cabin base designed to repel bumps

> Option to decorate the cabin

> Reflectors on tyres and cabin base

> Steering damper, one position. For a stable, comfortable ride

> Internal gear

winther cargoo

A CARGOO makes it quick and easy to carry goods, children and other cargo around. It is suitable for personal or business use and can carry cargo of up to 100 kg – without impacting the environment.

SPACIOUS BOX The spacious box is 86 cm long and 70 cm wide. It is lower at the front, so it is easier to lift heavy things on and off.

ROOM FOR KIDS OR CARGO If you want to bring the children along a seat package and a transparent cover can be bought. The transparent cover opens at the front and the sides and has a 360 degree view. The blow-moulded plastic seats are equipped with safety harnesses, and there is plenty of room for both legs and luggage. With the transparent cover the Cargoo is suitable for children up to 135 cm.

MANOEUVRABILITY ON THREE WHEELS A Cargoo offers excellent road-holding capabilities, and it is easy to manoeuvre – even when you have to cut corners while carrying a load. The steering system is a head-tube solution with steering damper for a comfortable, stable ride.

DURABLE QUALITY The cabin is easy to decorate and is made of impact-resistant, highly durable ABS plastic. This makes it robust, durable and easy to clean. The top edge has been reinforced using a steel tube, and all components are high quality, so it is built to last whether you use the cycle for personal or business use.

WHAT WILL YOU NEED?

Cargoo allows optional equipment to be added, depending on your requirements for example:

- > Transparent cover and alu bars or flat cover
- > Seat package
- > Seat padding
- > Luggage carrier with light
- > Electric motor
- > Garage cover
- > Sun screen and insect net

CARGOO

KIDS OR CARGO

Cargoo can be used for both. It comes with or without seats that can also be removed after use.

SOLID BASE FOR GOODS

The goods are kept nice and stable in the base of the cabin, which is made of reinforced plastic with a wooden plank at the front. If you need an extra heavy-duty base, an optional full-cover aluminium plate is available as an accessory.

TECHNICAL INFORMATION

Frame construction: Aluminium 6061 (rear frame) and steel (front frame)

Cabin base: Impact-resistant ABS plastic

Flat cover: Nylon, shower-proof fabric

Steering system: Head tube solution
