> Separate blow-moulded plastic seats with safety harnesses. Padding optional

> Impact-resistant cabin base designed to repel bumps, with decoration possibilities

> Low entrance height

> Mono hub with closed ball bearings and disc brakes as standard

winther kangaroo

KANGAROO LITE is a high-quality family bike easy to use. The user-friendly design with a focus on the essentials will soon make this an important part of everyday life when the children need to be transported to and from institutions or anywhere you wish to go – comfortably and safely.

PLENTY OF SPACE IN THE CABIN Safety harnesses hold the children securely in the strong blow-moulded plastic seats, and there is plenty of room for children up to 120 cm tall. The entry is low, which makes getting in and out easy. The front of the cabin can be opened and held in place with hooks, and you can easily keep an eye on the children through the panoramic window.

RELIABLE BRAKES, WHATEVER THE WEATHER Disc brakes on the front wheels as standard and a footbrake on the back wheel mean safe braking, whatever the weather.

STEERING DAMPER FOR A STABLE RIDE Kangaroo Lite has a steering damper to keep the bike stable and comfortable to ride and easy to steer. Seven internal Shimano gears with footbrake come as standard.

PROTECTION AGAINST THE ELEMENTS Rain and wind don't really matter when the children are safely seated in the cabin. In the summer, the cabin can be opened at the front, and a sun screen can be mounted. A cover can provide additional protection for the hood when it is left out in the rain – and to extend its service life if the cycle is left outside in the sun. Sun screen and cover are optional accessories.

DECORATING THE CABIN The cabin base is made of ABS plastic, which is easy to decorate, for example with stickers and labels. This way, the children can help make the bike their own.

WHAT WILL THE FAMILY NEED?

Kangaroo Lite allows optional equipment to be added, depending on your requirements for example:

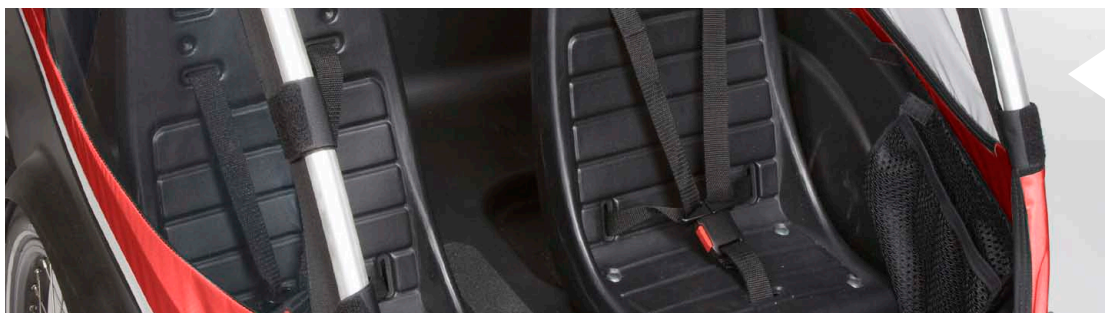

- > Garage cover
- > Sun screen and insect net
- > Padded seats
- > Interior pockets for small items
- > Luggage carrier with light
- > Electric motor

HOLDING THE CHILDREN SECURELY

A five-point harness holds the children securely fastened. The impact-resistant cabin is designed to repel bumps with its rounded ABS material, and it is fitted with reflectors.

TECHNICAL INFORMATION

Frame construction: Aluminium 6061 (rear frame) and steel (front frame)

Cabin base: Impact-resistant ABS plastic

Hood: Nylon, shower-proof

Steering system: Head tube solution

Front wheels: 20 x 1.75 with mono-suspended hub, double-walled aluminium rim and disc brakes as standard
